

Booking Multiple Members On EliteLive

If your EliteLive app doesn't allow you to book on other members, or you can't be booked on by other members, please follow these steps.

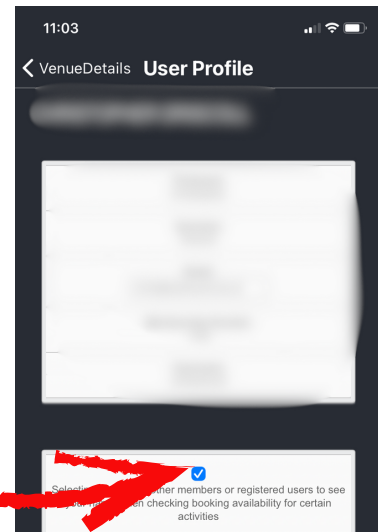

STEP 1

Go to the homepage, and click the profile icon to bring up your user profile.

STEP 2

On the user profile screen, scroll down to the series of check boxes, and ensure that the top one (*“selecting this allows other members or registered users to see your name when checking booking availability for certain activities”*) is ticked.

STEP 3

Finally, scroll to the bottom and press the *update* button. Without doing this, your settings will not update.
